*Author Daniel W. Evans*

**An acrostic to help develop and maintain solid family foundations.**

- F** Foundational - the natural or prepared base on which some structure rests. (Structure for life starts in your family.)
- A** Acceptance - approval and favor. (When no one else does, family will approve of you and give you favor.)
- M** Membership - belonging to a society, community or other body. (Your status as a family member will not change.)
- I** Inherent - existing as a permanent or inseparable element, quality or attribute. (Add value to your family.)
- L** Love - a feeling of warm personal attachment or deep affection, as for a parent or child. (Unconditional love!)
- Y** Yours - belonging to or associated with you. (A sense of belonging to a family helps establish you for life.)

Every family has some type of dysfunction. Good examples of families are those whose focus is not on the dysfunction. Their focus is on togetherness, love, respect and support of each other; and how to fit into and add to society. Solid family foundations helps prepare an individual for the rest of the world that is made up of families as well. Make a positive difference in your part of the world!
